The Original Loader

B-P has been pioneering the Side Loader market since 1959 and it is a well known leader in design and manufacturing of lift trucks. Today B-P produces a wide range of Diesel Hydrostatic Side Loaders from 3T to 7T, Diesel Power Shift Side Loaders from 4T to 25T, Electric Side Loaders from 2T to 7T, Diesel 4-Way from 4T to 7T and Electronic Multidirectional Forklifts from 2T to 4T. B-P is a ISO9001 certified company and with more than 10,000 trucks delivered to 80 countries B-P is recognized for its proven track record of consistent delivery of quality and reliability to its customers worldwide.

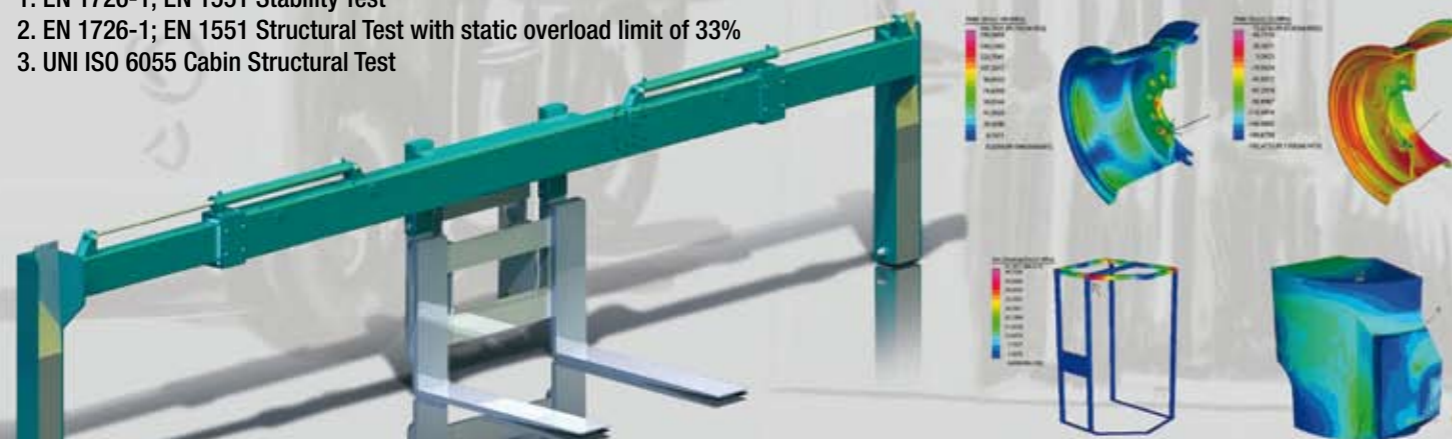

- 1959 - The first Side Loader for timber loading was introduced in the Italian market. This loader represented a major innovation as it was the first of its gender in Europe designed to save space in stacking of wood panels and long profiles.
- 1964 - This year marked the start of export sales. By 1970 B-P became a well known brand synonymous of quality and innovation all over the world.
- 1967 - B-P opened a new manufacturing facility of 15,000 sqmt floor space in a 40,000 sqmt of land dedicated to the production of Side Loaders trucks.
- 1977 - B-P diversified its product portfolio offering Side Loaders for container application with capacity from 20T up to 55T and small-medium capacity diesel Side Loaders trucks ranging from 2T up to 15T and became a leader in this market.

- 1988 - The Electric Side Loader from 2T up to 7T was launched into the market. Today B-P Electric Side Loaders are equipped with AC technology.
- 1989 - B-P broadened its electric portfolio introducing a Fork Lift Truck of 5T capacity and subsequently of 6T and 7T.
- 1995 - The highly innovative Electronic Multidirectional Fork Lift ranging today from 2T to 4T was launched into the market. Eight years later the CAN BUS technology was adopted as standard control and monitoring system on all B-P Electronic Multidirectional Fork Lifts.
- 1999 - The 4-Way Multidirectional Fork Lift joined the B-P product family and is being offered in diesel and LPG versions from 4T up to 7T.
- 2007 - The 2T Electronic Multidirectional Fork Lift joined its bigger 4T brother.
- 2009 - B-P celebrates 50 years of innovation.

B-P has always been paying a special attention to safety and reliability. B-P utilizes only top quality components and systems from original world class manufacturers. B-P Side Loaders and Multidirectional Forklifts are designed to comply with extra margin to the most stringent and up to date EEC reliability standards of directives 98/37/EEC (Machinery), 89/336/EEC, 92/31/EEC, 2004/108/EEC (Electromagnetic compatibility) and 2006/95/EEC (Low Tension) such as:

1. EN 1726-1; EN 1551 Stability Test
2. EN 1726-1; EN 1551 Structural Test with static overload limit of 33%
3. UNI ISO 6055 Cabin Structural Test

B-P non conformance cost over revenue is as low as 0.4%. B-P trucks lifetime has been reaching 40 years and the value of a B-P truck is maintained through the years well above market average. B-P and its suppliers are UNI ISO 9001 2000 certified.

Fast and safe handling of long loads by means of Side Loaders and Multidirectional Forklifts enable B-P customers to overcome space restrictions, save space and make a more efficient use of the available space. Side Loaders and Multidirectional Forklifts ultimately reduce handling costs, reduce warehousing investment costs and reduce operating costs. B-P customers can be found in the industries of timber processing; sawmill and woodworking; wooden panels and furniture; aluminum and frames; iron and steel plates; metallurgy; iron, steel and fiberglass pipes; insulation panels; concrete; plastic and PVC; painting and plating; petrochemical and many others.

HT15 Diesel Power Shift Side Loaders from 4T to 25T
